

# Sabina

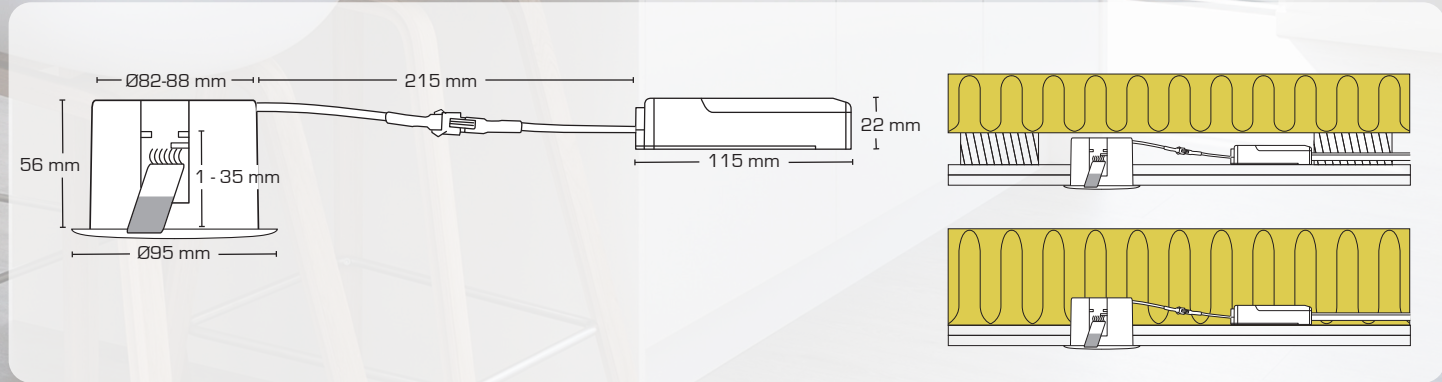

- Sabina is an adjustable, flicker free LED downlight with high light output and high color rendering. Approved for installation directly in insulation and flammable material.
- Minimal glare (UGR19) due to the retracted LED chip and reflector.
- Possibility of 2 spring positions - depending on the ceiling construction.
- Screwless cable relief and wire mount in terminal box, ensures a quick and easy assembly with minimal use of tools.
- Driver can easily be separated from the luminaire, which can be an advantage when painting.
- Designed and developed in Denmark.

**Flicker free!**
